These species lists are compiled from records in the Ocean Biodiversity Information System (OBIS) and the Global Biodiversity Information Facility (GBIF), corrected to align with the World Register of Marine Species (WoRMS) taxonomic backbone, then coordinates matched to nearest localities in the Registry of place names in Norwegian Polar Areas from the Norwegian Polar Institute, DOI: 10.21334/npolar.2011.a2813eb6

This document is a work in progress and should not be considered comprehensive.

Additionally, this document is restricted to records determined to be “offshore”: no “island” locality nearby.
